- "meta-laws" that a computer program has to abide by determine the extent to which L, E, J powers can be collapsed, if at all:

  - open or closed source

  - governing bodies who impose regulations. e.g. lawsuit against Facebook's Tag Suggestions for violation of biometric privacy law

- an expanded reading: code as an articulation, an ordering of human productive capacities e.g. job descriptions

  - potential alienation of man from his product and labour

  - potential hegemony (Gramsci): "hegemonic class" exercised political leadership over "subaltern classes" by "winning them over"

The <u>seizure-inducing</u> image of the frenzied sovereign <u>eye</u> is suggestive of the way in which <u>sovereign power</u> operates.

Provide a justification of this portrayal of sovereign power.
